PROFILE

Aspiring Junior software developer based in Pandi, Bulacan, specializing in React, Node.js, and REST API development. Builds clean, responsive applications with a focus on automation, and performance.

SKILLS

Programming: JavaScript, Python, PHP, C++
Database: PostgreSQL, MySQL, Supabase
Tools: Node.js, React, Laravel, Express.js, Alpine.js, FlutterFlow, Docker, Git/GitHub, REST APIs
Design Tools: Figma, Canva, GIMP
Other: UI/UX design, Graphic design
AI Tools: ChatGPT, Claude, Gemini

LANGUAGES

- English (Conversational)
- Tagalog (Fluent)

EDUCATION

Bachelor of Science in Computer Science **2022 - 2026**
College of Mary Immaculate Pandi Bulacan

WORK EXPERIENCE

Jcas Logistics **Intern → Freelance Developer** **APRIL 2025 - SEPTEMBER 2025**

- Started as a 1-month intern; retained as a freelance developer afterward based on performance.
- Built HR system modules, a Drivers Companion App, and Operations/Booking dashboards using FlutterFlow and Supabase, streamlining JCAS Logistics' internal operations and driver management.

FEATURED PROJECT

Immaculearn — Capstone Project, College of Mary Immaculate **SEPTEMBER 2024 - MARCH 2026**

- Collaborated with a team to build a full-stack Learning Management System (React, Node.js, Express.js, MySQL) for academic institutions, supporting three distinct user roles (students, professors, admin) each with their own dashboards and tools.
- Contributed to core features including collaborative document editing, activity/quiz creation, file sharing, class spaces, calendars, chat, and grade viewing

Invitr — Digital Invitation & RSVP System

- Built a full-stack event invitation and RSVP management system using Laravel 12, MySQL, and Tailwind CSS, featuring guest management, automated email notifications, and real-time RSVP tracking.
- Implemented three customizable invitation templates with live preview, Google Maps integration, QR code generation, and countdown timers using Alpine.js for dynamic frontend interactivity.
- Integrated Brevo SMTP for automated email delivery and designed a mobile-responsive admin dashboard with guest analytics (attendance tracking, headcount summaries, CSV export).
- Leveraged AI-assisted development tools to accelerate prototyping and debugging throughout the development process.

SpillRate — Community Business Rating & Moderation Platform

- Built a full-stack business review and rating directory using React 19, Node.js, Express.js, Supabase PostgreSQL, and Tailwind CSS, featuring public storefronts, rating breakdowns, and review management.
- Implemented a database-driven 24-hour anti-spam cooldown via IP and device verification, automated sequential business slugs, storefront QR code generation, and infinite scroll with TanStack Query.
- Integrated Google OAuth, Cloudinary image uploads, and Google Analytics Data API across merchant and admin dashboards for business verification, review replies, and report moderation.

Content Scheduler — Cloud Video Storage & Page Scheduling System

- Built a full-stack cloud video library and scheduling web app using React 19, Node.js, Express.js, Supabase Storage, and Tailwind CSS, with a three-tier folder hierarchy (Main Folders, Branches, Subfolders).
- Implemented multipart MP4 video uploads via Multer, file renaming and cross-folder relocation across storage buckets, and real-time state synchronization using Socket.IO and TanStack Query.
- Integrated Google OAuth and Facebook Graph API for linking Facebook Pages, alongside dashboard modules for configuring page looper schedules, viewing post feeds, and tracking creator milestones.
